3. Faculty of Correspondence Education and Re-training
4. Training of Managerial Staff and Scholars
5. Faculty of Paid Education
6. Institute of State Management in Civil Defence

The academy has the **license for the training of foreign citizens** based on the paid contracts at basic faculties, post-graduates school of Candidate's and Doctor's Degrees.

Basic faculties are:

1. Fire prevention activity
2. Fire & rescue operations

Faculty of fire prevention activities training specialists for emergencies and man-caused accidents prevention, coordination work for liquidation of its consequences.

Graduates are capable for the next activities:

Conducting expertise of design and invoice building documents

Determining fire hazard and technical danger of manufacturing processes by calculating

Designing of engineering for equipment and building protection from hazardous factors

Fire safety control

Organization and legislation of fire prevention activity

Conducting public fire preventive work, training and education fire and life safety rules

Faculty of fire rescue operations activities training specialists for fire fighting and conducting rescue operations during liquidation of emergency consequences.

Graduates are capable for the next activities:

Coordination work of fire and rescue units during liquidation of emergencies, fires, transport accidents, accidents at chemical and nuclear plants,

Monitoring and prediction of emergencies

First aid

Specialities: "Fire safety", "Psychology"

Specialisations:

- Fire Prevention
- Fire and Rescue Operations
- Automated Management Systems and Fire Service Dataware
- Fire Alarm Installations and Technological Automated Machinery
- Fire Protection and Life Safety

Educational qualification standards:

- ❖ Bachelor
- ❖ Specialist
- ❖ Master

In academy work:

- ✓ 11 doctors of sciences, professors
- ✓ 92 candidates of sciences
- ✓ 64 senior lecturers work

There are 876 cadets and 653 students, 1043 correspondence students training at the Academy at the moment.
